WE ARE HAPPY TO ANSWER ALL YOUR QUESTIONS!

EFFECT

Anafer Garden is a liquid NK fertilizer with iron, providing indirect action against moss.

- **Nitrogen** promotes **vigorous growth**, and a deep green color of the grass, resulting in a dense and resilient lawn.
- **Potassium** enhances the lawn's **resistance**, strengthening the cell wall, for an improved resistance to foot traffic and overall grass quality.
- **Iron** facilitates the **production of the green pigment** in grass, promoting a consistent, attractive appearance of the lawn. Additionally, iron has an indirect but rapid effect against moss.

The iron present in Anafer Garden is **biodegradable**, making Anafer Garden a safe product for humans, animals, and the environment!

Anafer Garden is characterized by its **easy application** and its **immediate effect**.

COMPOSITION

Total nitrogen (N)	6%
Ureic nitrogen (N-NH ₂)	5.2%
Potassium oxide (K ₂ O)	4%
Iron (Fe)	2%

USE

Application period

JAN	FEB	MAR	APR	MAY	JUN
JUL	AUG	SEP	OCT	NOV	DEC

Application conditions

Use on dry, short-cut grass when the outdoor temperature is 5°C or higher for better results.

Application method

Apply with a hand sprayer, pressure sprayer, or backpack sprayer using coarse droplets.

Dosage

Dilute 0.5L-1L of Anafer Garden in 10L of water for a 100m² lawn.

Aftercare

If desired, verticutting can be done half an hour after application.

PACKAGING

Available in 1L bottles, 5L spray bottles and 20L spray bottles.
