## EFFECT AND COMPOSITION

Manamos forms a suffocating physical barrier for mosses and therefore has a preventive and cleaning effect. Due to the presence of essential oils, the product will penetrate deeply and have a long-lasting effect.

## APPLICATIONS

### TOEPASSINGEN

#### 1) Tree trunk cleaner

- After 4 days, lichens on the bark will die off.
- Penetrates deep into the bark, resulting in a very long-lasting effect (2 years).
- When applied to the trunk, the tree will not be affected.

#### 2) Container cleaner

- After 2-3 days the liverwort will have died off.
- Long-lasting effect that keeps the pot clean for a long time.
- With targeted application, the container plant will not be affected.

#### 3) Stone cleaner

- After 3-4 days, the lichen and liverworts will die off.
- Does not leave stains on paving or natural stone.

## DOSAGE AND USE

- ***Shake well before use and then apply the product as soon as possible to avoid loss of efficiency due to phase separation.***
- To be applied with a hand sprayer, knapsack sprayer, field sprayer or watering can.
- 1 litre in 10 litres of water for 100 m<sup>2</sup>. Cover the moss thoroughly with Manamos.
- Can be used all year round at outside temperatures of 10°C and above. Avoid use during or before rainy conditions.
- It is recommended to first apply to a test area in case of new crops.
- Harmless to children and pets when used correctly. As a precaution, keep the product out of the reach of children and animals.

## PACKAGING

Available in 1L bottles and 5L spray bottles, 10L spray bottles and 20L spray bottles.

\*Manamos can be used on leaf-bearing plants. As physically active agents can cause burns in direct contact with the leaf, it is advisable to avoid contact with the leaf as much as possible. This applies especially to young leaves and on sunny days.
